

MOHAMED YASSER ALZAHAR

Frontend Developer | React Specialist

+20 100 939 0789 | mohamedyzahar@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building responsive, high-performance web applications using React 19, TypeScript, and modern JavaScript. Experienced in integrating RESTful and AI-powered APIs, managing state with Redux Toolkit, and converting Figma designs into clean, reusable components. Proven ability to improve web performance by up to 20%. Committed to writing scalable, maintainable code and contributing effectively within agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Dart
Frameworks & Libraries: React 19, Next.js, Vite, jQuery
Styling: Tailwind CSS, Bootstrap, SASS, Responsive Design
State Management: Redux Toolkit, Context API
API & Integration: RESTful APIs, Axios, JSON Parsing, AI API Integration
Cloud & Database: Firebase (Auth, Firestore, Cloud Functions), SQL, SQLite
Tools & Version Control: Git, GitHub, VS Code, Webpack, Postman, CI/CD Basics
Architecture: SOLID Principles, Clean Architecture, OOP, MVC, MVVM, Component-Based Design
Mobile: Flutter & Dart (cross-platform iOS & Android)

WORK EXPERIENCE

Frontend React Developer | Upskilling Mar 2026 – Jul 2026

Frontend React Developer | CORELIA Jan 2026 – Apr 2026

- Improved web performance by 20% through efficient React component structuring, code splitting, and lazy loading.
- Converted Figma designs into high-quality, reusable UI components following clean architecture principles.
- Integrated RESTful APIs and optimized data fetching and async state management using Redux Toolkit.
- Participated in agile sprints, code reviews, and collaborated closely with designers and senior developers.

Flutter Developer | NAMASoft Apr 2025 – Sep 2025

- Developed and maintained cross-platform mobile applications using Flutter and Dart.
- Implemented complex, responsive UI designs from Figma with pixel-accurate results.
- Applied BLoC pattern for clean separation of UI logic and business logic.

Flutter Developer | Noouh Integrated Solution Jan 2025 – Mar 2025

- Built 5+ mobile applications from scratch using Flutter, covering full feature development.
- Improved application performance by 30% through widget tree optimization and efficient state handling.

Frontend Developer | DGTizers Jul 2022 – Sep 2023

PROJECTS

Quiz-App

Jul 2026

Technologies: Next.js 15, React 19, TypeScript, Tailwind CSS, Axios, React Hook Form, Context API, JWT, Shadcn UI

- Built a role-based Quiz Management System with separate Instructor and Student experiences, featuring quiz creation, question management, student enrollment, groups, results, and responsive dashboards.
- Implemented secure JWT authentication, Protected Routes, role-based authorization, reusable components, custom hooks, and Axios Interceptors to ensure scalable architecture and clean API integration.

- **GitHub:** <https://github.com/mohamedyasser123/Quize-App>
- **Live Demo:** quize-app-xmxn.vercel.app

Hotel Management System (HMS)

Jun 2026

Technologies: React 19, TypeScript, Material UI (MUI), Axios, React Hook Form, React Router, i18next, Context API

- Co-developed a comprehensive Hotel Management System (HMS) supporting Admin, Customer, and Guest roles with secure authentication, protected routes, and role-based access control.
- Built responsive management modules for Rooms, Facilities, Bookings, Users, Ads, and Dashboard, utilizing reusable components, custom hooks, and shared services to ensure scalability and maintainability.
- Designed an interactive analytics dashboard featuring dynamic charts, statistics cards, server-side paginated data tables, multilingual support (i18next), and optimized API integration using Axios for efficient data management.
- **GitHub:** <https://github.com/mohamedyasser123/Hotel-Managment-System-HMS->
- **Live Demo:** hotel-managment-system-hms-zk5i.vercel.app

Project Management System (PMS)

May 2026

Technologies: React19, Tailwind CSS, DnD Kit, TanStack Table, ApexCharts, Axios

- **Co-developed a robust Project Management System (PMS)** with Role-Based Access Control (RBAC), enabling managers to assign tasks and track employee progress efficiently.
- **Built an interactive Task Board** using DnD Kit for smooth drag-and-drop workflows, and engineered data-heavy tables utilizing TanStack Table for seamless user CRUD operations.
- **Designed an analytics dashboard** integrated with ApexCharts for real-time project metrics visualization, alongside secure user registration and account verification flows.
- **GitHub:** <https://github.com/Gamalebrahim13/BMS>
- **Live Demo:** <https://bms-jlo6.vercel.app/>

Doc Extract Premium

Mar 2026

Technologies: React 19, TypeScript, Tailwind CSS, React Router

- Built a full PDF extraction pipeline (Upload → Split → OCR → Download) with smooth, reliable UX.
- Handled file uploads, REST API integration, and async state management (loading, success, error).
- GitHub: github.com/mohamedyasser123/ducu-extract-premium

Intelligent Document Data Extractor

Feb 2026

Technologies: React 19, TypeScript, AI API Integration, REST APIs

- Integrated AI-powered text recognition APIs to extract and structure data from unstructured documents.
- Built an intuitive file-upload and preview UI with optimized performance for large document inputs.
- GitHub: github.com/mohamedyasser123/Intelligent-Document-Data-Extractor

Smart Vehicle Information System

Jan 2026

Technologies: React 19, TypeScript, OCR AI API, Tailwind CSS

- Developed a web app retrieving vehicle data from license plate input via an OCR-based AI service.
- GitHub: github.com/mohamedyasser123/Smart-Vehicle-Information-System

EDUCATION

Bachelor of Computer Science & Artificial Intelligence

2023

Helwan University | Major: Software Engineering

CERTIFICATIONS & COURSES

- Front-End Developer – Instant | Dec 2025 – May 2026
- British Council English Course | 2025 – Present
- Flutter Developer – RMS | 2022
- Front-End Developer – RMS | 2021
